

Fairy Homes & Mouse Houses

Building miniature homes is a wonderful outdoor activity to do in your backyard, local park, or at the beach.

Imagine what creature will live in the home you build. Will you make a Mouse House or a Toad Abode? How about a home for a fairy, gnome, turtle, chipmunk, or even a snail!

How to Build a House

- Homes should look natural so they are almost hidden.
- Find a quiet place like the base of a tree or the side of a rock.
- Use natural materials: sticks, bark, dry grasses, pebbles, acorns, pine cones, feathers, and dry leaves.
 - Acorn caps and small shells make nice dishes.
 - Fluffy seeds and moss make nice beds.
- Be respectful of plants that living. Fairies and Forest Animals do not like to destroy anything that is growing.
- Different seasons offer different materials. Try making a snow house in winter, a leaf house in fall!
